

XENIUM

COMPANY PROFILE
INTEGRATED CAPABILITIES

**Great
spaces.**
One surface
at a time.

Xenium Andalan Indonesia (Xenium) specializes in the supply and installation of architectural carpets under the Brand name Tarkett Tandus Flooring, made in USA and Asia, Xenium as the exclusive distributor of Tandus Carpet in Indonesia, it is providing floor covering solutions to seven segments, namely Office/Commercial/Government, Education, Residential, Retail, Healthcare, Airport, and Hospitality. The brand offers the industry's most comprehensive array of product choices

For every project Xenium can provide just the right combination of design, style, color, texture, price wise and performance. With products of 10-15 years warranty, 10 years of after sales, and 10 years product continuity.

Xenium have the breadth of product choices to ensure that clients get the right total solution for the project - all from one single source.

Diverse Design

Each space is unique. So our goal is to collaborate closely with you — whether you're an architect or designer, distributor or installer, homeowner or end-user — to help you create great spaces with flooring that meets your unique goals.

For every type of environment and every need in performance and design, you can choose and co-create innovative products from our vast portfolio of flooring and sports surface solutions — one of the largest in the industry — with our expertise and support to guide you at every step.

Across soft surfaces, hard surfaces and accessories, you receive solutions created with healthy materials to support wellbeing — all to help you create optimal environments for working, learning, healing, relaxing and living.

Doing Good. Together.

Creating healthy spaces that promote the wellness of individuals, communities and the planet: it's what you value and what our world needs. It's what we at Tarkett are working to achieve by practicing responsible stewardship of our planet's resources, combating climate change and designing products for human wellbeing. We're connecting our sustainability efforts with the needs of our wider community, to drive us all further, together.

Inclusive Spaces

Every space should support both the experience of the individual and the needs of the collective people using the space. We help you achieve this vision through a collaborative, inclusive approach to design — one where you can co-create your flooring with us, across resilient and soft surface platforms, to deliver a fully tailored experience for the people in your space. Our approach unites your ideas with our broad range of industry-leading collaborators, resulting in flooring that inspires great spaces and is more conscious of the needs of people.

Tarkett is a world leader in flooring and sports surface solutions.

Driven by Cultural Shifts

Through our ongoing research in cultural trends, we explore how macro influences in today's society are impacting architecture and design. We discover new understandings of the human experience, shifts in our sense of community and evolving expectations for physical environments. All of these changes influence our product designs, helping us bring you flooring products that are responsive to people's current and future needs.

Carpet

Creative patterns and superior performance are the hallmarks of our soft surface solutions, with versatile designs in modular carpet, Powerbond®, broadloom, woven, Axminster and area rugs.

Office

There are now five generations in the workforce, from Traditionalists in their 70s to Generation Z in their early 20s - all of whom work very differently and have different expectations of the workplace. More and more, offices need to adapt to changing needs, while providing each person with a unique user experience and environments that will maximize their productivity

Improving
Employee
Work/Life

Cultural Shift: Work/Life Flexibility

With our increasing connectivity, the workday is no longer 9-5. It's 24/7.

As the division between at-work and away-from-work is blurred, employees are seeking greater flexibility from their work spaces.

A recent Fidelity survey found that 86% of Millennials will take up to a 12% pay cut to have a more flexible work environment.

The design of a workplace plays a significant role in shaping the kind of comfortable, supportive environment and inclusive culture being sought by employees. For one in three workers, the design of an office affects their decision to work at a company, as reported by trend research firm Stylus. Increasingly, employees are expecting spaces to be more attentive to their changing, individual needs.

Creating Spaces That Adapt to People's Needs

When people are happy, their work performance can improve by as much as 20%.

Our flooring solutions are designed to help you give people the flexible, comfortable environments they need to feel supported and perform at their best.

Recommended Solutions

Tarkett Solution SPECTrum™ provides coordinating flooring across all product types and accessories, delivering all product types and accessories, delivering the right type of flooring for each space.

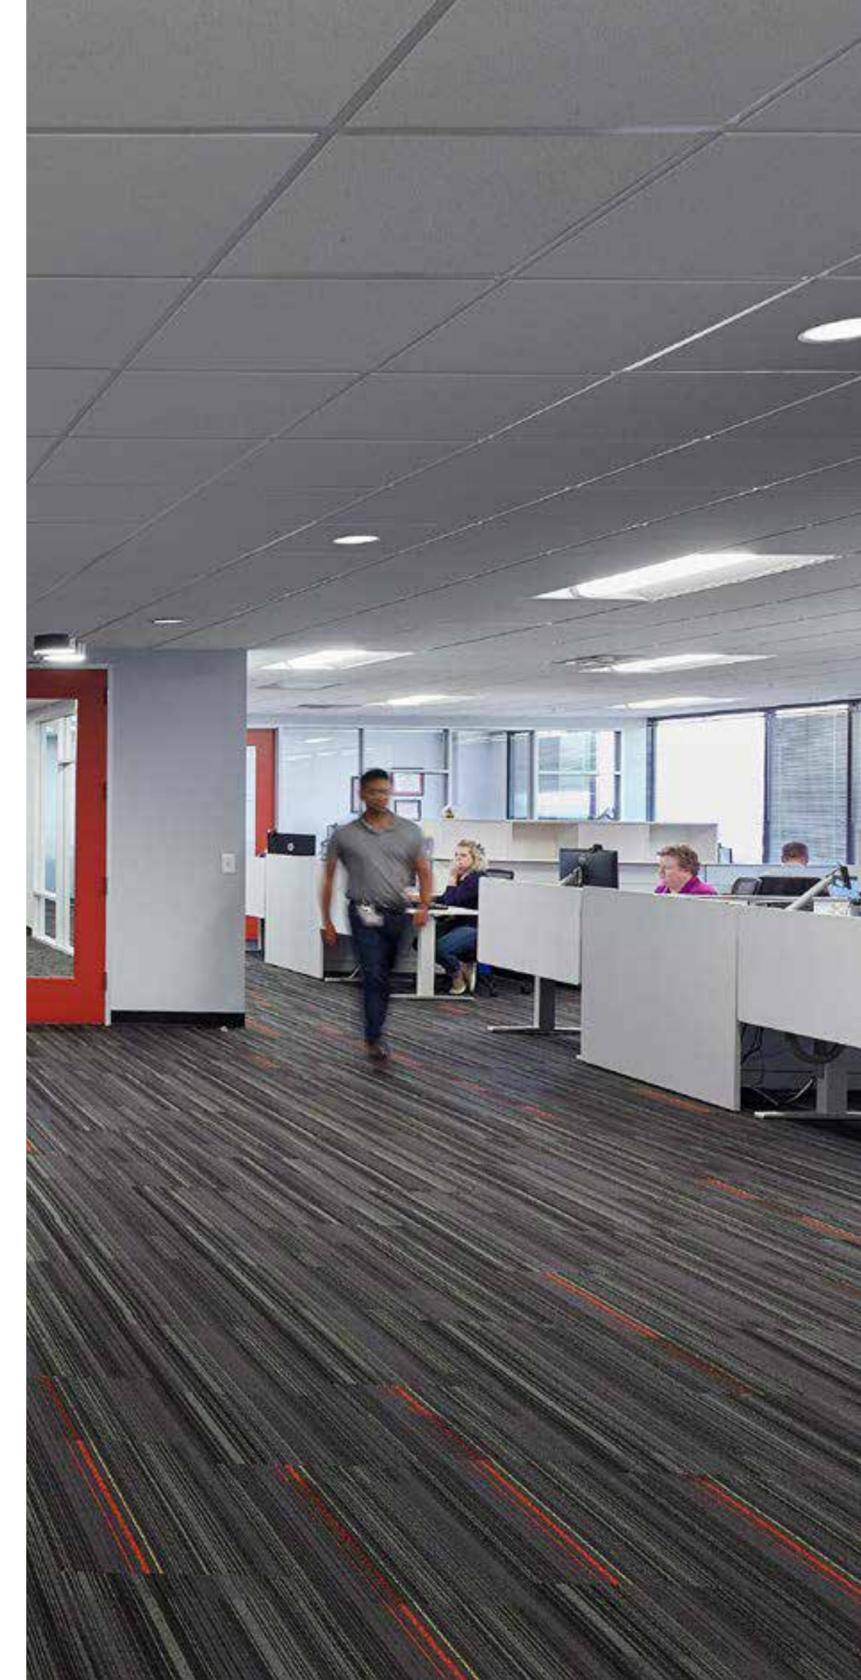

Modular carpet and LVT with cutting-edge designs are easy to mix and match to form uniquely customized, inspiring environments.

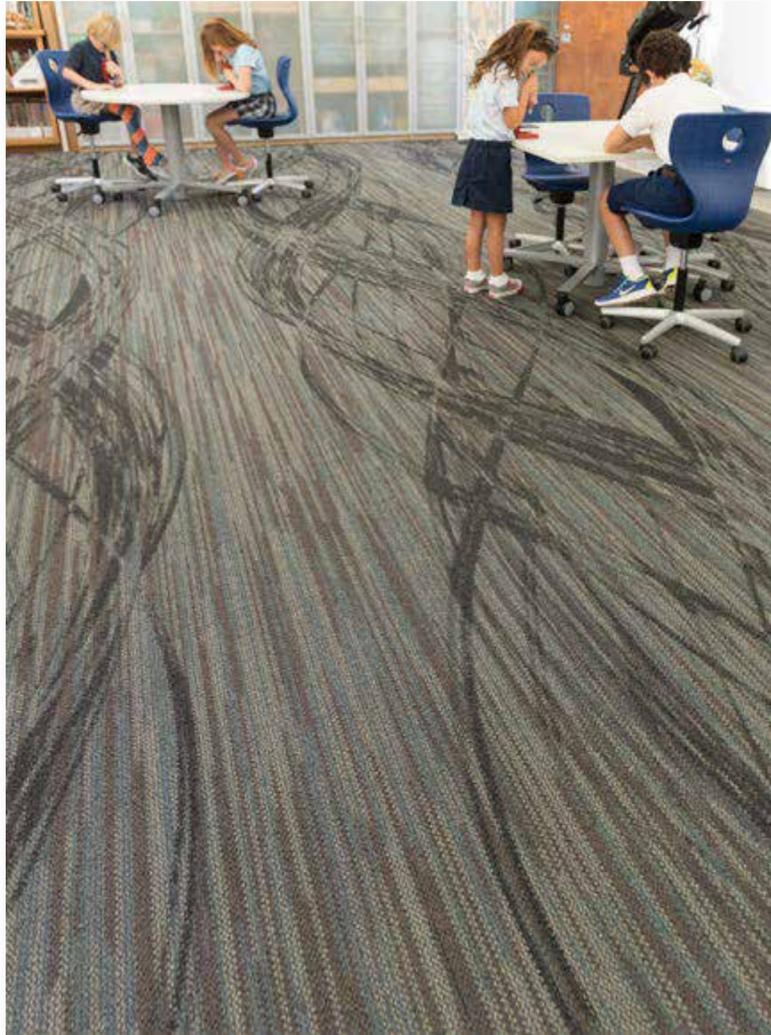

Tatami System is a revolutionary floor covering for open, collaborative environments, allowing people to reconfigure their spaces while softening acoustics and improving overall comfort.

Education

Offices aren't the only spaces that are becoming more flexible. Greater awareness of the wide variety of learning styles has resulted in a shift toward a multi-sensory approach to learning. Classrooms – and every space in a school – are turning into dynamic places where multiple activities can happen simultaneously.

Optimizing Environments for Students

Cultural Shift: Lack of Focus

A study funded by the Department of Education found that elementary school students spend 25% of their time distracted, rather than learning.

To help students focus, teachers are shifting instructional styles toward shorter lessons and multi-modal, sensory learning activities. Yet this more dynamic mode of learning and teaching necessitates more adaptable kind of spaces.

It's not only K-12 where flexible environments are needed: as higher education becomes more cross-disciplinary, and recruitment & retention more competitive, providing adaptable spaces can increase opportunities for learning, while improving students quality of life.

Maximizing Learning Opportunities

For optimal learning, students need spaces that facilitate a wide variety of activities.

With Tarkett's proven portfolio of healthy flooring solutions, you can provide flexible spaces for students to spend more time focused on learning and less time distracted by their surroundings.

Recommended Solutions

Powerbond® hybrid resilient sheet flooring provides moisture-impermeable durability that is proven to perform-delivering unparalleled value.

Rubber flooring offers comfortable resilient solutions that are exceptionally durable, slip resistant for increased safety and very low maintenance.

Lino and LinoWall are certified Cradle to Cradle Certified™ Silver, and treated with our unique surface protection for durability, ease of cleaning and cost-effective maintenance.

Cradle to Cradle Certified™ is a certification mark licensed by the Cradle to Cradle products innovation institute

Healthcare

Research has proven that the design of a healthcare facility, from the lobby to exam areas to patient rooms, directly impacts the satisfaction and stress level of patients, not to mention the performance of staff. With reimbursement rates tied to patient experience and HCAHPS scores, creating environments that contribute to healing becomes paramount.

Contributing to
Patient-Centered
Care

Cultural Shift: Caring for the Whole Self

According to studies published in the Journal of General Internal Medicine and the Health Services Research Journal, patients hospitalized for heart attacks who reported a positive experience with their care had better health outcomes.

This connection isn't isolated. The Agency for Healthcare Research Quality, which developed the HCAHPS survey program, states that positive patient experiences strongly correlate to better prevention and management of illnesses.

Providers and facilities are emphasizing a comprehensive approach to healthcare, one where the entire patient is cared for, not just their illness or injury. This patient-centered care approach encompasses a broad range of parameters, including infection control and improving staff performance, as well as delivering greater support and wellbeing through the design of the physical environment.

Delivering a Healing Environment

Each element in a healthcare facility needs to support the positive experience of patients and allow providers to focus on care.

Our solutions help by bringing you a holistic combination of safety, comfort and aesthetics, while being durable and easy to keep clean.

Recommended Solutions

Phtalate-free homogeneous sheet and tile deliver ease of cleaning for infection control and extreme durability.

Powerbond® MedFloor® is impermeable to moisture, provides superior durability and ease of maintenance, and offers excellent roller mobility.

The industry's widest range of accessories, from stair treads to wall base, is available to coordinate with all products for a cohesive installation.

Residential

With the population aging in the US and abroad, senior living environments aim to do more than house the elderly and accommodate aging-related conditions. Like healthcare spaces, senior living is shifting focus toward promoting the greater wellbeing of residents and fostering a stronger sense of community and care.

Supporting a Comfortable Lifestyle

Cultural Shift: A Growing Senior Population

According to the US Census, by 2035 Adults aged 65 years and older will outnumber children aged 18 years and under - a first in US history.

This shift toward an older population is a global trend. Nearly 22% of the world's citizen will be 60 years or older by 2050. When designing any interior space, from workplaces to stores to hotels, we should be increasing our focus on supporting an older demographic.

The environments created specifically for senior living need to consider maximum functionality for aging residents, family members and staff, while promoting an active lifestyle.

Fostering Total Wellbeing

Senior living communities must balance the beauty of hospitality, the comfort of home and the safety of a healthcare environment, all in spaces that support social activities.

We can help you promote wellness and a sense of community with flooring solutions that are not only comfortable and low-maintenance, but also designed with active seniors in mind.

Recommended Solutions

LVT inspired by natural materials coordinates a variety of active spaces throughout the senior living community.

Garden Walk Collection, available in broadloom, Powerbond® and modular carpet, creates an inviting atmosphere ideal for relaxed living.

A comprehensive selection of flooring surfaces and low-profile transitions ensures a beautifully coordinated floorplan and safe passage through every space.

Retail

With the growth of e-commerce, brick-and-mortar stores are capitalizing on their key advantages over digital platforms, namely that a physical store offers customers a sensory, holistic experience - one with its own unique conveniences, plus the ability to surprise with unexpected delight.

Delivering
a Unique
Experience

Cultural Shift: Experience-Driven Shopping

E-commerce sales made up 51.9% of all retail sales growth in 2018. It's growing its share of total retail sales, too: from 11.6% in 2016 and 12.9% in 2017, to 14.3% in 2018.

With sales increasingly shifting to digital, physical stores are driving business through a less transactional, more experiential model.

Creating an Engaging Environment

Drawing people into a store (and keeping them coming back) means offering a unique, enjoyable experience in an engaging setting.

Create inviting spaces with our innovative flooring solutions, designed to help you deliver a lasting brand impression.

Recommended Solutions

Pentagonals rubber tile delivers complete creative freedom with three unique shapes and a broad variety of colors that combine in striking tessellations.

Composition tile offers a multitude of patterns and budget-friendly quality options to optimize the design and performance of high-traffic areas.

IMAGINATIONS™ custom flooring insets allow you to capture attention and communicate your brand through memorable designs

Hospitality

Whether traveling for work or leisure, guests in the age of home-sharing are increasingly expecting delightful accommodations and seamless, individualized service. Hospitality environments are focusing on building personality while delivering memorable, personalized experiences for guests, from supporting their wellness to immersing them in local culture.

Building Guest
Loyalty

Cultural Shift: Younger and International Travelers

According to Cornell's Center for Hospitality Research (CHR), Millennials will represent 50% of all travelers in the US by 2025.

The CHR also projects that the number of international travelers will nearly double by 2036.

With a new kind of traveler comes new expectations for hospitality brands to embrace - the need to be luxurious and local, sustainable and authentic, with an even greater emphasis on superior service and personal attention.

Supporting a Transformative Experience

Hospitality environments are working harder to earn guests' loyalty by providing a personalized experience.

You can design one-of-a-kind spaces quickly and easily with our incredible range of customizable flooring products, engaging guests with your brand's unique personality.

Recommended Solutions

Collections Infinies™ digitally printed LVT enables you to co-create and custom-create flooring for your spaces, helping you craft an inspired environment.

Axminster woven carpet provides unequalled beauty, rendering even the most complex custom patterns with clarity and delivering long-term durability.

iD Mixonomi™ offers LVT in graphic shapes that combine to create layouts ranging from traditional to bold, in a diverse palette inspired by global travel.

Everyone Deserves Healthy Materials and a Healthy Planet

When you partner with Tarkett, your flooring choices actively support the health of people and the natural world. We've aligned our company with Cradle to Cradle™ principles, bringing you product solutions made with healthy materials and sustainable manufacturing processes, backed by our company-wide commitment to building a healthy, circular economy.

Sustainable practices for a healthier tomorrow.

Tarkett has been following the principles of circular economy for over a decade, using them to guide us in creating products that are safe for people and the planet.

Through a focus on circular economy, our products are designed to consider every stage of the building life cycle, from manufacturing to installation to maintenance to replacement. In fact, we were the first in the flooring industry to create a recycling program, called ReStart®, which reuses materials sourced both inside and outside the flooring industry.

Creating Healthy Flooring

98% of our raw materials are third-party assessed for their impact on people's health and the environment based on Cradle to Cradle™ criteria. This has allowed us to create products that are low emitting, use fewer natural resources and contribute to the design of healthier indoor spaces.

70% of our materials are abundant, rapidly renewable or recycled, and do not contribute to resource scarcity—all helping to reduce our carbon footprint.

Our ReStart® Program reclaims and recycles post-installation vinyl, carpet and linoleum.

97% of our flooring is low VOC, contributing to the wellness of the people in the space. With 90% of our time spent indoors, this helps ensure safe, healthy spaces.

100% phthalate-free means our products are low emitting and use fewer natural resources, so you can create healthier indoor spaces.

Sustainability-Driven Manufacturing

Zero production waste in our facilities by 2020.

50% of our US facilities use renewable electricity.

27% of our total global energy consumption comes from renewable energy sources.

67% of our facilities use closed-loop water circuits or do not use water in their process, helping to preserve natural resources.

8.5% reduction in our greenhouse gas emissions between 2010 and 2018, with continuing reduction in greenhouse gas emissions to reach carbon neutral at all facilities.

Cradle to Cradle Certified™ is a certification mark licensed by the Cradle to Cradle Products Innovation Institute.

Tarkett Lino: Sustainability in Practice

Made of natural raw materials, our Lino is created with the same sustainable recipe we've been using for more than 120 years. Cradle to Cradle™ Certified Silver and manufactured with almost 100% renewable energy, this iconic flooring supports the health of people and the planet.

Advanced Solutions for Every Need

Inspiring Design Solutions That Streamline Your Process
We're here to help you at every step of the design process, offering a range of services that make it easy to create cohesive designs for your entire floor plan or customize any of our product types. We can even manage your entire flooring project for you, from design to installation to maintenance training.

Design Solution Highlights

Designer on Demand®

Let us build renderings of all of your flooring designs, courtesy of our Designer on Demand team. Simply submit your project online, and our designers will create beautiful renderings that you can share with clients.

Imaginations™ Custom Floor Design

Our Imaginations Custom Floor Design program is used for more intricate and detailed designs. Designs are fabricated and custom cut at our manufacturing facilities, shipped to the job site and inset by the flooring contractor.

Source One®

Our project management program completely streamlines the entire flooring process for your project, providing coordination of estimates, ordering, delivery, installation and long-term support to ensure your project's success.

Tarkett Solution SPECTrum™

Explore product technologies that solve problems and create better spaces: with our comprehensive product portfolio, you can use any or all of our flooring types to create seamless designs that improve human performance while contributing to people's health and happiness.

Life Cycle Cost Analysis

Learn how Tarkett flooring can help you reduce your total cost of ownership without compromising on your design: use the Life Cycle Cost Analysis Calculator on our website to compare floors and see the real cost of installing and maintaining different products.

Visualization Tools

Create individualized flooring designs for your spaces quickly and easily with our array of digital visualizers. View your choice of running-line styles in a broad range of spaces, or customize and visualize products from a variety of inspiring soft surface and resilient collections, including Tatami System, Tailored Twist, iD Mixonomi™, Collections Infinities™ and Pentagonals.

Flooring Technologies for Every Space

Product Technologies That Work for You

Across resilient flooring and carpet, we make our products with advanced technologies that not only give you more durable flooring than competitors, but also provide solutions for high-moisture subfloors, tight installation timelines, greater safety needs and more – and all with our dedication to healthy materials.

Technology Solution Highlights

Tectonic™

Tarkett's advanced polyurethane technology offers 18% better abrasion resistance, best-in-class scuff resistance and 40% better scratch resistance, ensuring that your floors look nicer, longer.*

Digital Print Technology

With our state-of-the-art digital printing technology, Tarkett is able to recreate the look of everything from natural wood grains and stone effects to your favorite upholstery. Send us your concepts to inspire a fully customized LVT flooring that's uniquely your own.

Powerbond®

Our innovative hybrid resilient sheet flooring delivers a long-lasting, high-performing solution. Powerbond's closed-cell cushion backing is inseparable and offers an impermeable, wall-to-wall moisture barrier, eliminating the need for RH and MVER moisture testing.**

ethos® Modular with omnicoat technology™

Offering a PVB backing, ethos® is made from recycled windshield glass film. When used with TarkettTAPE, this breakthrough product is unaffected by moisture and pH, eliminating the need to test for pH, RH and MVER.**

TarkettTAPE™

Delivering a fast installation of modular carpet, including installations on high-moisture concrete, TarkettTAPE is odor free, low VOC and eliminates the need for full-spread adhesive.

Transcend™ SureSet™

Transcend SureSet LVT is a repositionable product that is easy to install, easy to repair and great for high-moisture slabs, thanks to a pre-applied adhesive backing and waterproof technology. Transcend SureSet saves time and money on maintenance, with a high-performance urethane finish that enhances durability and cleanability.

* Compared to leading competitor

** Provided that no free liquids are present and that no moisture-stained concrete is evident.
